

**Digestive system student worksheet answers**

**I'm not robot!**

**\*\*Note\*\***There is a newer version of this activity that includes a drag-and-drop exercise, the addition of the biliary system, and quiz. \*\*\*\*\*This worksheet was made for anatomy students to practice labeling the organs of the digestive system. There are two versions included, one with a word bank for beginning students and one without a word bank for a greater challenge. The student worksheet is available for free at [image](#) was adapted from Wikimedia Commons image and is released to the public domain: Digestive system without labels.svg added the boxes and word bank to the worksheet. Answer key and both versions of the student handout are included in the download. StandardsDevelop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms. Emphasis is on functions at the organism system level such as nutrient uptake, water delivery, and organism movement in response to neural stimuli. An example of an interacting system could be an artery depending on the proper function of elastic tissue and smooth muscle to regulate and deliver the proper amount of blood within the circulatory system. Assessment does not include interactions and functions at the molecular or chemical reaction level. Included are 30 videosheets and answer keys for Bill Nye-the Science Guy video series by Disney Entertainment. Videos can be accessed via [www.learn360.com](http://www.learn360.com) .
